

RM-12 Series Cove Lite

SERIES

RM-12

Slim profile cove accent lighting with decorative white molding included.

Moldings can be field painted or stained to clients color choice.

Miter cuts both inside and outside are easily accomplished at job site.

12 volt, 1 watt lamps are provided in either Extra Bright (EB) 1.2 inch lamp spacing or Standard Bright (STD) 2 inch spacings.

10,000 hour lamp life, 3.8 lumens, 2200 K color, all at economical 12 volts.

Cove light system is completely dimmable for creating just the right amount of accent lighting.

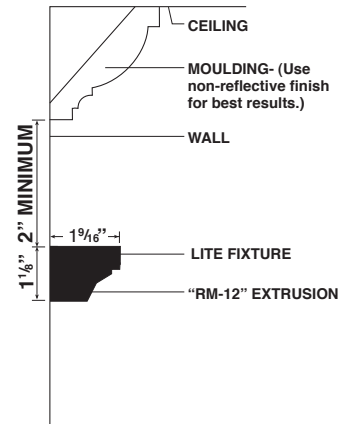

Maximum light lengths with Extra Bright (EB) lamps spacing is 10ft. long and 15ft. for Standard Bright (STD) lamp spacing.

Lights should be ordered to the 1/2 inch of length required or can be field shortened at the job if required.

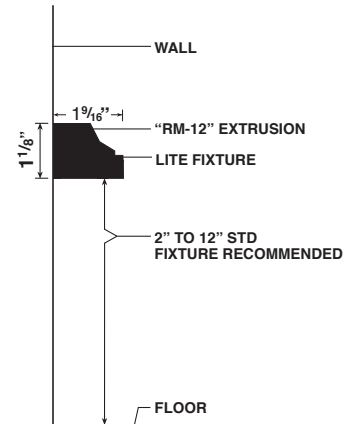

Accent cove molding can be ordered and pre-shipped in bulk for installation before ordering light from field measurements.

Light system is 12 volt and requires transformers supplied by Roberts. Transformers are installed remotely with secondary wiring running back to the light locations. With room dimensions supplied, Roberts will be happy to aid in working out power point locations for your room dimensions.

CEILING APPLICATION

BASE APPLICATION

Roberts RM-12 Series Cove lighting is designed for wall mounting to direct soft glow lighting up toward the ceiling or down toward the floor. The RM-12 Series is the perfect choice to enhance and highlight the beauty of a particular style of moldings, or to provide corridor lighting for special effect and safety of movement.
